

Sprint 1 Contributions — Cheyma Abidi

Role: Reviewer/Tester **Period:** 2026-09-19 to 2026-09-27

Summary

Reviewed and validated the project's initial frontend setup, GitHub Pages CI/CD pipeline, authentication and onboarding flows, and resume upload/storage functionality. The main focus was ensuring that the implemented features are functional, deploy correctly, and are ready for testing and review.

Key Contributions

GitHub Repository Setup

- Reviewed the initial GitHub repository setup and project organization
- Verified that team members were added with the appropriate repository permissions
- Reviewed the repository's base folder structure for documentation, meeting minutes, AI logs, and sprint deliverables
- Verified the GitHub project board was configured for sprint and task tracking
- Reviewed branch protection rules

Authentication & Onboarding

- Reviewed the Login and Register pages and their expected user flows
- Checked the authentication flow for successful and unsuccessful login scenarios
- Verified that authenticated users can access the Dashboard

Resume Upload Feature

- Reviewed the resume dashboard and file retrieval flow
- Checked that uploaded resumes can be accessed through the intended authenticated flow

Code Quality / Project Structure

- Verified that shared types are organized in a central location for use across Sprint 1 functionality
- Reviewed the overall organization of the frontend components, pages, libraries, and types

Documentation

- Added missing information to the README
- Made, maintained and uploaded sprint planning 1

Pull Requests Merged

PR	Description
#23	Update README, upload AI Log, upload sprint planning 1
#25	Upload Sudhansu's AI Log
