

AI Usage Log of Cheyma Abidi

Task 1.1: Generating Effort Estimates of Sprint Plan 1

Purpose of AI Use: Estimating the effort estimates (in hours) for each issue in sprint plan 1.

Prompt/Response:

*In her prompt, Cheyma copies her Excel table into the AI.

Exact prompt: "3 Add project description to

README 4 Prepare an initial login page 5

Add installation guide on

README 6 Test login page 7 Complete the backend 8 Add sprint plan to repository 9

Add first + second third

meeting minute 10 Complete the authentication 11 Test authentication 12

Improve style of the login

(user did not enjoy it) 13 Update the frontend 14 Test the new frontend of login 15

Complete team process

definition 16

Upload resume feature (user

uploads resume) 17

Error message appears at

login (user didnt enter the

right credentials)

28 Confirmation message on

resume upload (user wants to

see confirmation) User Hide password (user sees that their password to be hidden) User Replace resume feature (user wants to replace resume) User Logout feature (user logs out) User Empty login fields (user tries to login with empty fields) User Error message appears at resume upload (user didn't upload file) User Seeing the name of the uploaded file (user wants to see it) User Delete resume User final verdict (user uses all features in one session) User Review AI logs Task Complete last meeting minute

I know the format is messed up. there are 26 tasks. I want you to estimate the effort needed (in time) for each"

Response: https://chatgpt.com/s/t_6ab89b39fb188191876b40926443fd21

Validation: Personal judgment and discussion with teammates.

Decision:

- A significant amount of the AI's input was accepted.
- However, estimates that seemed inaccurate were adjusted by Cheyma after discussing with the team.

Reflection: AI helped give the team an idea of how much time would be needed for each issue, but some estimates were inaccurate and modified accordingly.

Responsible Person: Cheyma Abidi
