Sprint 2 Contributions — Sudhansu Mohanty

Role: Developer (Find Jobs Feature, Job Detail View, SerpAPI Integration, Sprint Planning & Task Breakdown)

Summary

Contributed to Sprint 2 by taking responsibility for the job discovery experience — building the job catalog feed, search and filter toolbar, and the job detail panel with the Apply Now trigger. Also integrated SerpAPI to surface external job postings alongside recruiter-created listings, and co-led sprint planning and task breakdown with Cheyma.

Key Contributions

Sprint Planning & Task Breakdown (with Cheyma): 1 hr 45

- Participated in planning Sprint 2 deliverables and identifying the work required to implement features.
- Broke down larger requirements into smaller development tasks.
- Helped clarify feature scope, implementation steps and task dependencies.

Job Catalog Feed (US-2.05): 3 hr 30

- Built the responsive job feed page displaying active postings with metadata badges (title, company, location, salary range, and workplace type).
- Implemented conditional badge rendering to handle missing salary or workplace data gracefully.
- Added sorting functions to distinguish between recruiter-posted jobs and external API listings.

Multi-Filter Search Toolbar (US-2.06): 2 hr 30

- Implemented the search bar with keyword filtering and multi-filter controls (location, category, remote/hybrid pills).
- Added debounce optimization to reduce unnecessary re-renders on input.
- Displayed active filter state visually and updated result count as filters change.

Job Detail View & Apply Now (US-2.08): 3 hr 00

- Built a slide-in panel displaying full job details when a posting is selected from the feed.
- Added the primary Apply Now button with a placeholder application flow for Sprint 2.
- Fixed a database issue that prevented new profiles from being created correctly.

SerpAPI Integration: 2 hr 00

- Integrated SerpAPI to pull in external job postings and surface them alongside recruiter-created listings.
- Added filtering logic to cleanly separate internal vs. external postings within the feed.

Commits

Commit	Description
7a7d167b	Add Find Jobs page with search and filters
6e0ee41e	Added slide-in job detail panel and Apply Now button
781a8c7f	Added sorting to distinguish recruiter vs. API jobs
59f2d0fc	Fixed the database issue, we can create a new profile now
14a28daf	Integrated SerpAPI to show external job postings
dcebe951	Added Sprint 2 details and moved docs to sprint-details
