AI Usage Log - Sprint 2

Project Title: LaunchPadAI - Job Search and Application Tracking Platform

Course: SOEN 341 Software Process (Fall 2026)

Team Member: Cheyma Abidi (40340971)

Feature: Feature 1 – Profile Management and Resume Management (Sprint 2)

Tool: ChatGPT

Log Entry 1: Choice of Tools for Profile Management (related to TASK-2.01)

What AI did / what I did: ChatGPT presented the options available for handling profile management. I made the final decision as to how I would proceed with implementation of the feature, and started implementing the feature.

Prompt: "https://github.com/sudhansu-mohanty/SOEN341-launchpadai. if I wanted to implement a profile management feature, what tools/language would be more fit for the task?"

AI response: https://chatgpt.com/s/t_6adeb709be6c819192a33a28f4f4ee7d

Validation: Personal judgement, level of comfortability with options suggested, and discussion with a teammate. I am currently taking a course about SQL databases, so I prefer that tool over the others. Moreover, a teammate suggested that I use Supabase, as that would be the easiest option in their opinion.

Decision: The second option (Supabase + SQL) was chosen.

Log Entry 2: Adding Supabase-related File (related to TASK-2.02)

What AI did / what I did: AI pointed out that the issue with my version of the product was a missing file. I fixed the issue by adding the missing file.

Prompt: " im trying to run my code but when I run I get a sup abase error", project files were sent to the AI

AI response: https://chatgpt.com/s/t_6adeb94f82dc8191b3afadffbea7626d

Validation: I tested AI's solution.

Decision: Accepted.

Log Entry 3: Fixing Supabase-related Issue (related to TASK-2.02)

What AI did / what I did: AI pointed out that the issue I'm experiencing could be due to a missing step on the project's Supabase. I asked my teammate with Supabase access to apply the solution on Supabase.

Prompt: " https://github.com/sudhansu-mohanty/SOEN341-launchpadai. when I run my code, I can access the profiles page. but when I do, it tells me that the profile table wasn't created"

AI response: https://chatgpt.com/s/t_6adebb64391881919bf1faf2980da568

Validation: I asked the teammate with Supabase access to test the AI's solution.

Decision: Accepted.

Log Entry 4: Summarizing Resume Code (related to TASK-2.02)

What AI did / what I did: AI summarized what files related to resume management were about, and what they did. I used this understanding to implement the missing feature of resume management.

Prompt: "summarize these files so that I can navigate them and add a new feature", files were shared with the AI

AI response: https://chatgpt.com/s/t_6adec09086e88191bc3d1ed768917240

Validation: I asked the teammate responsible for writing these files if the AI's analysis was accurate.

Decision: Accepted.

Responsible Person: Cheyma Abidi
