

SOEN 341 — Sprint 1 AI Usage Log

- **Student Name:** Othmane Balmouddane (ID: 40284183)
 - **Role:** Backend & Database Engineer
 - **Assigned Backlog Scope:** US-07, US-08, US-09 (All AI-Generated)
-

1. Baseline AI Generation Session (Mandatory 10 User Stories Prompt)

- **Task ID / Title:** AI-GEN-01 — Baseline Core User Story Elicitation
- **Purpose of AI Use:** Generate 10 baseline Agile user stories covering job seeker and recruiter core flows to bootstrap the product backlog.
- **Chat Link / Prompt Used:**

You are an Agile product owner and software architect. Act as an assistant for a team building a web application called LaunchPadAI using Next.js, TypeScript, and Supabase. Generate exactly 10 initial Agile user stories covering core functionality across Job Seekers and Recruiters (including registration/auth, profile management, resume upload, job creation, search/filtering, applying, application tracking, and candidate pipeline review). For each user story, provide:

1. Standard format: "As a [role], I want [feature], so that [benefit]"
2. Acceptance criteria (testable, binary conditions)
3. Technical subtasks decomposing the implementation across frontend and backend.
